

FOREWORD

This citrus publication is the tenth Annual Citrus Statistical Summary released by the Agricultural Marketing Service and is made possible through the cooperation of the Florida Department of Agriculture and the Florida Citrus Commission. The Office of the Agricultural Statistician, Agricultural Marketing Service, Orlando, cooperating with the State Department of Agriculture and Growers Administrative Committee collected and/or assembled the data. The Florida Citrus Commission furnished funds for materials and did the actual multilithing.

The Agricultural Marketing Service, through its office in Orlando, would like to take this occasion to express its appreciation of this cooperative spirit shown by those connected with the Citrus Industry and to acknowledge the statistical and financial aid of the Citrus Commission, the Citrus and Vegetable Inspection Division, Florida Department of Agriculture, the Growers Administrative Committee, the cannery data furnished by the Florida Canners' Association and the considerable volume of basic data given by the citrus growers, packers and processors.

CITRUS SUMMARY

HISTORY - I/

The exact date of the introduction of citrus trees into Florida is not known, but from a statement made by Pedro Medendez, dated April 2, 1579, it appears that other citrus fruits were growing in abundance around St. Augustine at that time. Early settlers in Florida some two centuries later found wild citrus trees scattered over the State.

The citrus tree is a native of the Orient. It was carried ever westward from the Far East to India, to the Eastern Mediterranean, to Italy, to Spain. It was brought to the Americas by Columbus. When he landed on November 22, 1493, he brought citrus seeds that were planted on the Island of Haiti. The first seeds planted on the mainland of the Americas were brought by the expedition of Juan de Grijalva when he landed in Central America between July 12 and July 20, 1518.

The oldest cultivated grove planted in Florida (Hume, 1926, p. 95) is thought to be the Don Phillippe grove in Pinellas County, planted some time between 1809 and 1820.

PRODUCTION

Citrus production in Florida had reached the all-time high of 6 million boxes when the Great Freeze of 1894-95 almost totally wiped out the citrus industry. It took fourteen years to reach this level of production again.

Florida surpassed all other States in citrus acreage in 1932-33 with 265,400 acres, which accounted for 46 percent of the United States total acreage. By 1956-57 Florida's 533,800 acres of bearing groves were pro-

I/ See the Citrus Industry by Webber & Batchlor, pages 19, 22, 25 and 27.

ducing 68 percent of the total citrus in the United States on 67 percent of the total United States acreage. This was 135,600,000 boxes for Florida out of United States total of 198,085,000 boxes. During this early period of Florida's citrus history other areas also increased in production. In 1919-20 California accounted for 60.3 percent of the total United States production, but by 1956-57 had dropped to 28 percent of the total United States production with 54,500,000 boxes. California's largest crop was produced in 1944-45 with 76,880,000 boxes produced. Texas had a phenomenal expansion of citrus acreage between 1920-21, when only 600 acres were planted, to 1948-49 with its 122,500 acres. Most of this acreage was grapefruit. Then came the freezes of 1949-50 and 1950-51, which reduced acreage nearly 60 percent. Production was reduced from the 1947-48 high of 28,400,000 to 500,000 in 1951-52 and by 1956-57 it had increased to only 4,400,000 boxes. The cold damaged trees have not come back into production as expected. New plantings are being made, with 1,512,000 grapefruit trees and 568,000 orange trees moved from nurseries since 1952.

NOTE - Net contents of box varies. For California and Arizona, 77 pounds for oranges, 65 to 68 pounds for grapefruit. Florida and other States use a larger box of 1-3/5 bushel capacity. The Florida citrus code defines an equivalent box for bulk fruit as 90 pounds for oranges, 85 pounds for grapefruit and 95 pounds for tangerines.

TREE NUMBERS

It is estimated that there are 32.2 million producing citrus trees growing in commercial groves in the State of Florida. Of these, 24.3 million are orange trees of which 12.8 million, or 52 percent, are Early and Midseason type. Of the total orange production of 93,000,000 boxes in 1956-57, 54,300,000 boxes or 58 percent were Early and Midseason type. Late type orange trees number 11.5 million, or 48 percent of orange tree total, and accounted for 38,700,000 boxes or 42 percent of the orange production.

Of the 6.8 million grapefruit trees, approximately 37 percent are seeded type and 63 percent are seedless type. Seeded type accounted for 15,800,000 boxes or 42 percent out of a total of 37,400,000 and seedless type produced 21,600,000 boxes or 58 percent of the total grapefruit.

Tangerines accounted for approximately 3.5 percent of the total citrus production in 1956-57, with a little less than 1.2 million trees, producing 4,800,000 boxes.

Lime trees accounted for 6,800 acres and produced 400,000 boxes in 1956-57.

REVISIONS

Tree numbers have been revised based upon the count made by the State Plant Board in cooperative Industry-Government tree census.

NON-BEARING ACREAGE

It is estimated that as of June 30, 1956 there are 126,400 acres of non-bearing citrus trees planted in Florida. This consists of 104,300 acres of oranges; 4,400 acres of tangerines (a large part being late type); 2,600 acres of tangelos; 10,000 acres of grapefruit and 5,100 acres of lemons and limes.

PRICES

Prices have varied from the lows of the late thirties, when for the season of 1938-39 the equivalent on-tree from all methods of sale returned 22 cents per box for grapefruit, to the high of 1949-50 when equivalent on-tree return for grapefruit, all methods of sale, climbed to \$1.79 per box and in the 1956-57 season were 89 cents. Oranges varied from on-tree equivalents for all methods of sale of 52 cents in the season of 1939-40 to a high of \$2.37 in 1945-46 and were \$1.40 per box in the 1956-57 season.
